Subject: RE: LPRSA - CSTAG - couple of heads up items

Hey Beth - Thanks for checking in on this. I have the package Stephanie/Alice sent to CSTAG in 2008. I do also have the 11 principles memo that Alice sent for her CSTAG/NRRB meeting for the lower 8.3 in 2012.

Only thing I'm still looking for is the memo sent to CSTAG that covers the items I outlined in the email to the team the other day (CSM overview, risk discussions) specifically for lower 8.3 mile. This would be separate from the 11 principles memo.

Going to check a few more files Alice sent me, but if that pops out to you it would be certainly helpful to send over.

Thanks

Alice was getting the 2008 cstag files from lower 8 - did you get those (or do you want?)-- I could forward.

Subject: [EXTERNAL] LPRSA - CSTAG - couple of heads up items

Hey guys - CSTAG confirmed the meeting days. Those are Wednesday, 2/28 and Thursday, 3/1. Please forward the meeting invite to any folks I may have missed (Kristen C. and Dan C.)

There are a bunch more details that need to be worked out, but one of the items I'll be looking for assistance on is pulling together our info into a package on the follow topics. This will need to be submitted to CSTAG members no later than two weeks in advance of the meeting. We can chat more about format and time frame in the near future - this is mostly just a heads up.

1. A summary of all available contaminant data in sediment (surface and at depth), biota, and surface water
2. Full description of the CSM
3. Info on existing and potential eco and HH risks
4. Info on site conditions most conducive to dredging, capping, in-situ amendments, enhanced natural recovery (ENR), or monitored natural recovery (MNR)
5. Info on sediment deposition and erosion
6. Info on on-going releases and uncontrolled sources, including background contaminant concentrations in appropriate media.

I've also attached our initial draft schedule and an overview of CSTAG process and procedures for context.
